

Jonas Kamber

Senior UX/UI Designer

I'm a UX/UI Design Freelancer with 10+ years of experience. I usually work within teams of Developers, Designers and Product Managers to improve and simplify interfaces of complex enterprise web applications.

Senior UX/UI Designer at Kamber Interactive

Since 2015: As a freelancer I support leading Swiss internet companies as a UX/UI Designer. In the last 3+ years I was able to work on the largest Swiss websites (in terms of reach). I usually work in teams of developers and product managers (but also in design teams) to come up with ideas, create prototypes and test hypothesis with users. With my background in visual design and my knowledge about development I can provide high fidelity visual designs.

Focus:

- Working in interdisciplinary teams of Project Managers, Designers and Developers
- Creating cross platform concepts (user flows, mockups) for complex web applications
- Prototyping with tools or HTML/CSS/JavaScript
- Experience in creating and conducting user tests
- Extensive knowledge in Sketch and Adobe Creative Cloud
- Proficiency in Visual Design

Co-Founder & Lead Designer at Silp

2011–2014: As co-founder at Silp (recruiting through social media), I was responsible for the conceptual development of our products from coming up with ideas all the way through to the visual design. Focus on conversion in our interfaces let our user base grow to 8 million users. Silp was acquired in 2015.

Art Director UX at Namics

2008–2011: Started as Junior Art Director, I've got internal training to become an Art Director with focus on eCommerce. During my time at Namics, I led eCommerce design projects for companies like FREITAG, Melectronics, Interio and many others.

Interaction Designer at insyma

2007–2008: After my predecessor was hired by Google, I led the design department at insyma (as their only designer). We worked as a new media agency on small and medium sized projects for many different companies.

Graphic Design Vocational Education

2004–2007: In my vocational education ("Berufsllehre") at a marketing agency I was introduced into the "real" business world, after creating websites for small businesses for years. I worked a lot for their subsidiary company LiFECOM which was specialized in building corporate websites.
